

Common Approach To Children's Health

CATCH stands for 'Common Approach To Children's Health', which symbolises the joined-up approach to care we have adopted in Cheshire East.

The CATCH app provides parents and carers of children aged 0-5 with NHS-approved information to help you know when your child needs medical attention and when self-care would be more appropriate.

Regular notifications alert you about key health dates and facts, such as immunisation reminders and seasonal advice.

Highly localised information about healthcare in Cheshire East allows you to choose the right service at the right time.

All CATCH guidance is regularly reviewed by the local NHS to ensure information is up to date and reliable.
